Security at Fingertips

Multimodal IRiS Plus
Face Recognition For High Security

EyeFace-99

Specification

Face Capacity: 50,000

Screen : Screen with a full-view no less than 170 degree

Camera Resolution : 800×1280

Communication Mode : WIFI, TCP/IP

Bell Loudspeaker : Built-in 2W loudspeaker

Fill-in Light : Automatic infrared fill-in

Microphone : Used in video call and message leaving

Recognition Distance : 40cm-70cm (Full-coverage of iris and face)

Recognition Mode : Face, iris and multimodal recognition

Card Reader : Support M1 card/ second-generation ID card (optional)

Distance Sensor : Automatic activation by sensing movement of human body

Temperature Measurement Mode : Height-adaptive automatic rotational temperature measurement

Temperature Measurement Accuracy : ±0.3°C

Other Functions : Health QR code available

Features

Accuracy and Convenience Sense and recognize face, iris and multimodal feat-ures automatically.

Automatic height adapta- tion (1.3m-2.0m)

Automatic and intelligent 360-degree light fill-in.

Safe and convenient non-contact temperature measurement (accura- cy:±0.3°C)

Precise recognition even with masks and goggles.

Unified management of data and device on cloud platform.

Convenient in-screen card swiping.
